

Keep track of all your manuals in the IRIS Governing Documents module. A tree-based file structure easy to manage and use, with intuitive search functionality.

As a system administrator, there are many ways of deploying the documents:

- Upload documents to the IRIS server. PDF/Word/Plain text is viewable online, making it easier and faster to access the documents
- Connect your Sharepoint, Confluence or Google Drive to IRIS for automatic updates
- Edit documents in an Office application, e.g. word or excel and auto-save to IRIS

As a user, it is easy to search and find what you are looking for. 10 latest documents always available on Start page as well date range search to see added documents since last time on-board. as well date range search to see added documents since last time onboard.
