

INSPECTIONS & AUDITS

All type of inspection reports is possible to handle in IRIS, such as Internal ISM/ISPS/MLC audits, Flag State audits & inspections, SIRE & CDI inspections and Port State controls.

An ordinary audit or inspection can be very extensive. Thanks to the sophisticated IRIS Audit module, all work can now be performed completely paperless by use of tablets or phones during execution onboard.

IRIS also provides powerful features for management and planning of inspections and audits in the office, for preparations as well as follow ups.
